Hi Adam,

Great to see the My Fig project in action with the construction.

USC had passed along some info from you guys after a recent meeting and I noticed some of the phasing dates extended beyond the current construction schedule and into December. Can you provide an updated schedule for us when you get a chance?

Also, on the maintenance agreement, we're still waiting on John to get us the project details before we edit the agreement and send back your way.

Thanks,

Aaron
